

# CLINICAL CYTOMETRY EDUCATION NETWORK

---

## ABOUT THE PROJECT

---

Clinical cytometry is used globally to provide information for patient care. This practice is dependent on highly competent individuals who not only have an understanding of the principles of flow cytometry, but also have a working, clinical application specific, knowledge. However, clinical flow cytometry is a sophisticated technology that is constantly progressing and difficult to automate or even readily standardize. Therefore, there is a considerable need for ongoing clinical cytometry educational resources for cytometrists practicing in both developed and developing countries.

This is a multi-faceted collaboration endeavoring to create educational resources for the international clinical cytometry community, to host practical clinical cytometry courses in both developed and developing countries, to create an international network of clinical cytometry organizations and to facilitate training of young professionals via the Visitor Training Program.

The International Clinical Cytometry Society and the European Society for Clinical Cell Analysis is proud to announce our series of collaborative practical courses focusing on clinical cytometry.

We welcome you to take part in these unique course offerings that will focus on practical, hands-on, clinical flow cytometry education in a small group format using a combination of wet and dry labs. Content will focus on both basic fundamentals, as well as, specific clinical application.

### Future Courses

Austin, Texas - January 22-24, 2017

### Past Courses

San Diego, California - January 17-19, 2016

Lisbon, Portugal - September 2014

Clearwater, Florida - February 2015

Sao Paulo, Brazil - November 2015

Clinical Cytometry Education Network

## PARTNER WITH US

The Clinical Cytometry Education Network (CCEN) is looking for partners to support future cytometry courses both in the United States and internationally. We offer two types of partnerships. The first is a one year contribution for multiple courses. The second option gives you the opportunity to support one course of your choosing.

### Platinum Level

Acknowledgement of Platinum Level Partnership in the meeting syllabus and on the course website

4 Free registrations or donate to an attendee(s) from a developing country

Inclusion of analysis software in the dry lab component of the course

Mailing list of all course attendees provided

Option for sole sponsorship of a reception

Unmanned literature table in the registration area

**\$10,000  
One Year  
Partnership**

**OR**

**\$7,500  
Individual Course  
Partnership**

### Gold Level

Acknowledgement of Gold Level Partnership in the meeting syllabus and on the course website

2 Free registrations or donate to an attendee(s) from a developing country

Inclusion of analysis software in the dry lab component of the course

Mailing list of all course attendees provided

**\$7,000  
One Year  
Partnership**

**OR**

**\$5,000  
Individual Course  
Partnership**

### Silver Level

Acknowledgement of Silver Level Partnership in the meeting syllabus and on the course website

1 Free registration or donate to an attendee from a developing country

Inclusion of analysis software in the dry lab component of the course

**\$4,000  
One Year  
Partnership**

**OR**

**\$2,000  
Individual Course  
Partnership**
